

Aryan

BACKEND SYSTEMS ENGINEER · DATABASE ENGINEERING · WORKFLOW AUTOMATION

aryanf192811@gmail.com — GitHub: aryanf192811-eng — India

First-year CSE student designing scalable backend systems across ERP, EdTech, and travel domains. Focused on schema-first architecture, workflow automation, and API design — where data models, workflows, and state transitions are first-class citizens.

TECHNICAL SKILLS

Languages	C, C++, JavaScript, TypeScript, Python, SQL
Frontend	React 19, Vite 8, Tailwind CSS 4, Framer Motion, Zustand, KaTeX
Backend	Node.js, Express, FastAPI, Pydantic, REST APIs, Auth & RBAC
Database	PostgreSQL, SQLite, Supabase, SQLAlchemy, Raw SQL
Infra	Git, GitHub Actions, Vercel, Firebase, Uvicorn

PROJECTS

B-Cart — Manufacturing ERP

React 19 · Node.js · Express · PostgreSQL

- 22-table PostgreSQL schema across 8 normalized domains, 4 database views, Moving Average Costing
- Event-driven stock ledger — every movement immutable; full audit trail reconstructable from events
- Automated workflow pipeline: Sales Order → Inventory Reservation → Manufacturing Order → Work Orders → Stock Ledger
- JWT Access + Refresh token pair; RBAC enforced at controller layer with full audit logging

ExamForge — GATE Preparation Platform

React 19 · TypeScript · FastAPI · SQLite · Supabase

- Hybrid architecture: SQLite for question content (read-only, sub-millisecond, zero network overhead) + Supabase for real-time cross-device user state sync
- SM-2 spaced repetition engine scheduling questions by recall difficulty and interval history
- Typed FastAPI backend with strict Pydantic schemas and Bearer JWT auth; CI/CD via GitHub Actions and Vercel
- KaTeX rendering for GATE-level mathematics and engineering formulas

Traveloop — Trip Lifecycle Management

React 19 · Node.js · Express · PostgreSQL · Gemini AI

- 11-table PostgreSQL schema with 25 seeded cities and 57+ activity mappings; raw SQL throughout
- 30+ REST endpoints across 9 route modules using Express mergeParams; consistent `{success, data, meta}` response envelope
- Server-side PDF invoice generation via PDFKit streamed as blob; Gemini AI packing lists with offline fallback
- JWT + bcrypt auth, Multer photo uploads, role-aware admin analytics panel with Recharts

EXPERIENCE

Full-Stack Web Consultant — SoundRich Hearing

2026 · Freelance · Delhi NCR

- Audited clinic website and identified UX gaps and SEO improvement opportunities
- Built redesigned inquiry and appointment booking prototype from scratch
- Managed complete client communication and delivery pipeline independently

EDUCATION

B.Tech in Computer Science

2025 – 2029

Parul University, Gujarat

CGPA: 7.85 / 10

ACHIEVEMENTS

- Final Round** — Odoo × Parul University Hackathon 2026 (Semester 2)
- Delivered paid freelance consulting engagement independently in Semester 2

CERTIFICATIONS

HTML, CSS & JavaScript | Full-Stack Architecture & System Design Documentation
